ARTSYS360 Ltd	ARTSYS360® has developed a 3D-360° break through micro radar, detects track and spots threats from taking illegal video, smuggle substance and a flying small drone. It protects prisons, hotels, stadiums, power station government building etc. Our Micro Radar is an essential part of upcoming Smart City 3D Traffic management system which will enable monitoring of Drones traffic in urban areas. Additionally, a 77GHz 3D-360° micro radar is in development stage for Autonomous camtrons, based on a patented technological breakthrough (Israel Technion university) with best cost / performance in the market.	8	other	Each market that we are now active is a potential unicorn 1.FND – physical intrusion detection market is a \$16.7B market in 2017 in addition the 3D drone – Civil detection market is over \$12B. 2.3D Traffic management system in Urban area will grow in the next few years to several billions dollar market in which each city will enable flying drone. 3.Autonomous car market is going to explode in the next few years Our break through Micro Radar is suited to these 3 markets which has a high barrier of entry and high needs for such product	We have signed up several international distributors, in North America, Latin America and Australia. We received orders for more than 40 systems from several system integrators interested in enhancing prison security. We are negotiating with a strategic partner in China India Our investors came from Australia, Canada, China and Israel.	We have orders - we will start first shipment in Q4 2017	YES	\$25M
Brainster	Brainster is an innovative technological Neuromarketing platform based on EEG and Eye Tracking. Grounded in science, powered by cutting edge machine learning algorithms, the platform was designed to remain fast and simple and allow to measure directly at the Brain level (without social biases or cultural differences) what is the level of emotion and attention generated by commercials in the mind of consumers.	12	other	We have a commercial solution at hand (no technological risk - Approx US\$3m were invested by current shareholders to develop the solution) Our platform has already been used by Fortune 500 companies with success We have a global distribution agreement with IPSOS (3rd largest market research company in the world) We are clearly defined go to market strategy and business plan We are operating in large and growing market We have gathered a combination of competences such as machine learning, neuroscience, market research in-house We are scheduled to experience exponential growth	We have already performed studies for Fortune 500 companies with great success	Yes - we started selling in 2017.	Yes we are looking to raise US\$5m to finance our Go to market strategy and continue the development of our platform to include additional biometric measures as well as VR	US\$15m
CrystaEn semiconductor Ltd	CrystaEn developed and holds unique and state of the art technology, in the field of carbon based crystals producing and growing. The unique technology enable the growth of "single crystal" carbon crystals in fast controlled and green process. CrystaEn's technology fits various needs in several industrial fields include: -Conductors, semi-conductors, include photo-electric panels, LED units, energy batteries, transistors and diodes. -High-end optical devices, include carbon based lenses, lenses coating, radiation shields etc. -Anti-corrosion coating, stiff covers.	4	Semiconductors	Unique field of technology, technology that fits market needs, in various fields.	Technology, market, crew.	no	yes	5 m \$
Edgy Bees Ltd.	The Edgybees platform enables AR experiences across any high-speed moving device containing sensors and streaming data. AR application developers can now deliver overlays in sync and consistent with the human experience of high-speed motion in 3 dimensions. Drones, cars, and wearable devices are sample devices on which high-speed AR applications can be rendered for experiencing new forms of consumer and commercial applications.	8	other	The consumer drone market is coming into shape right now. Drone as a game is a new concept which is just now being defined, developed and promoted, and promises very large market. Edgybees is at a great position to become a leader and platform provider to applications in this field.	Very elaborate partnership with DJI, the largest drone manufacturer; Product on the market (DronPix AR game, available for iOS and Android); Paying customers such as Epson	Yes, preliminary	Yes	USD 9.5M
EZMEMS	Towards the age of sensors and IoT, where sensors are everywhere and everything is being sensed, the deployment of a large number of sensors requires them to be small, cheap and disposable. EZMEMS is going to revolutionize the world of sensors by introducing its disruptive technology and easy approach towards disposable polymeric chips with integrated electronics. EZMEMS is transforming simple disposables, without sensing or control capabilities, into "Smart Disposables" in an easy and cost effective way. The new generation of EZMEMS smart polymeric chips (SPC™) combine state of the art micro plastic and IC technologies to develop innovative polymeric micro electromechanical systems (PMEMS), which allow the sensing elements to be embedded within the disposable package. The design of the sensors allows intuitive and simple integration with disposable sets. EZMEMS was established in 2014, raised seed money from the Israeli Innovation Authority and private investors in 2015 and is cooperating with large companies to integrate the SPC™ into disposable kits.	2	other	Working prototypes, cooperation with very large companies. Generic technology, focused applications, will become a \$10B company	EZMEMS has a working prototype and is cooperating with large companies to integrate the SPC™ into their disposables.	Not yet, we are sending samples to large potential clients. intend to have initial sales in 2018	yes	20
VivoText	VivoText is a digital voice and speech technology company. Our Proprietary technology of voice recording and processing captures the unique speech characteristics of any voice and stores them in our patented Voice Sample Libraries. Our speech generation engine creates new speech that emulates the voice's full range of expression and emotion thereby sounding indistinguishable from the original.	7	Communication	Only VivoText creates natural, expressive and emotional virtual speech based on only 3-10 hours of recordings vs. 40-200 hours by others. Only VivoText offers a first-in-kind Photoshop-like speech editing capabilities. Only VivoText's technology can incorporate deep learning of the speech editing process for style and prosodic attributes, and apply deep learning algorithms in the selection of speech verbs.	We have a partnership with Hasbro, the global leader in the toys and games industry	Yes	Yes	\$6M
GuardKnox Cyber Technologies LTD.	GuardKnox is an automotive cyber-solutions company providing comprehensive cyber defense. GuardKnox's deterministic hardware solution the SNO, or Secure Network Orchestrator, is completely autonomous, does not require any constant online connectivity and can defend against both known or unknown attacks. The GuardKnox solution library provides security in-depth, with a central gateway ECU drop-in SNO, a local SNO for externally connected ECUs, as well as a reporting mechanism providing centralized fleet security. As a complete ECU, it integrates seamlessly into the vehicle, the value chain and the vehicle production process. The GuardKnox team brings decades of experience providing the cyber security solutions to the Israeli Air Force systems: Iron Dome, Arrow and Israel's F-35.	12 engineers + 3 international representatives	other	Unique solution that passed automakers tests	Working with OEM's and Tier 1 suppliers to the automotive market	We have started to get purchase orders this year.	Yes	\$30M
IOSight	IOSight is an innovator and a market leader in the field of infrastructure facility management. IOSight provides cost effective, user friendly B2B2a management and reporting solutions for medium-to-large water and energy infrastructure facilities reducing costs, improving efficiency, increasing productivity, saving energy and delivering regulatory compliance. With proven experience and customer satisfaction in the public utility, energy and manufacturing arenas worldwide, IOSight's solutions are a paradigm shift. For the first time plant managers and operators can get actionable, accurate, comprehensive, real-time insights into site performance.	15	other	The water and energy markets are highly appreciated to be the fastest growing markets of the next decade, and IT related technologies (IoT, Big data, machine learning and others) are the cutting edge fields. IOSight has a mature set of solutions and is well positioned in the USA, Israel and the EU	IOSight's products are installed at over 100 sites around the globe and has market leaders personnel as its POC approvals	yes	yes	6M\$
Myndift	Myndift enhances cognitive abilities using wearable and mobile technologies.	8	other	The company has received an investment from Miami Children's Hospital, 500 Startups, multiple funds and angels, in addition to two grants by the Ministry of Innovation. The product that's being developed is revolutionizing the cognitive enhancement field, as it has been distributed in multiple clinics helping hundreds of patients.	Launched the product in more than 33 clinics worldwide. Being used as part of anxiety, ADHD, and OCD therapies.	Yes - 40% month over month growth in MRR	Yes, we're looking to raise \$1.5m	\$4m
PiUp Mobile	Our technology helps call centers of banks, HMO's, telcos and more, enhance customer service, improve answering rates, reduce operational costs, and increase sales. We enable call centers to interact with their clients like never before, from phone call personalization and design, to secured 2-way digital interaction over phone calls. We started approaching clients 5 months ago, and are seeing overwhelming momentum.	7	Enterprise&IT software	* Disruptive solution for financial, health and telecom's customer service and sales. * Ultra fast momentum and demand over the last 5 months * Top tier local/Bank and HMO as first clients * Interest from top tier international players (Axa, Cit, Orange) * Solid business model * Proven technology, registered IP, innovative UX * Highly talented experienced team * in negotiations with a Chinese distributor	2 leading clients (bank + HMO), 10 more clients in pipeline (banks, insurance, telcos, etc). Leading international financial organizations interested in our solution-Cit, Axa, Orange.	We are working with 2 clients. First revenues are due in Q1 2018, as a part of a 5 year deal. Pricing is \$25 per calling station per month, representing a yearly \$300K for each customer from the 3rd year and on.	Yes, we are raising \$1M as a first milestone, in a \$2.5M investment round.	\$6.5M

QualityLine Production Technologies, Ltd	Real-Time advanced manufacturing technology to improve quality and efficiency of factories	12	Enterprise&IT software	Innovative Real-Time advanced manufacturing technology that is perfect for Chinese market as it is the biggest market for manufacturing. Right now the Chinese market is looking for innovative technologies to improve efficiency and quality and save a lot of money in manufacturing costs.	innovative data acquisition technology	yes - more than 300,000 USD this year	4,000,000 USD	12,000,000
RoutePerfect Ltd	RoutePerfect a multi-city trip planning and booking platform enabled through cutting edge technology. It helps its 1M global travelers easily create a personalized trip and book it as a discounted custom package. The company is going after the Chinese outgoing market and is seeking Chinese funding and partners for this.	20	Internet	We have a proven business model (\$1 in marketing returns with \$1.70) and we have the best planning & booking tool for a target of 200M travelers a year. We specifically are after Chinese funding (smart money) and partners because we want to capture a slice of the Chinese outgoing travel market.	\$2M in sales in 2016. ~\$300K in sales/month in 2017. 4M users globally. Raised \$4M to date from top investors + \$1M from the chief scientist in Israel. At +70% unit economics.	Yes. ~\$300K/month. \$2M in 2016.	yes	\$15M
Skopio Technologies S.I Ltd	Skopio is a semiconductor company that develops chipsets for the new ITU G.fast standard. G.fast technology enables network operators bring the speed of fiber over existing copper lines.	70	Semiconductors	Skopio is a leader in G.fast market that is expected to be a very significant market. Skopio is already working with leading Telcos and tier one equipment companies.	Leader in G.fast market. Design wins with key OEMs that are active in this market.	Yes	We plan to raise additional funds in Q4/2017	Pre money valuation will be USD 100M-120M
SmartGreen	SmartGreen develops and market advanced Energy & Operational management and optimization system for commercial and industrial facilities	15	other		1st Tier customers including HP, MacDonalds, Shuhsai, CLP and others	Yes.	Yes	\$10M
Spaceek Ltd	Spaceek is a cloud based IoT platform focused on Smart Parking. Our sophisticated engine collects real-time occupancy data of available parking spaces, analyses and ultimately connects drivers to these spaces using our own Bluetooth Low Energy sensors network - so we know Who parked & Where!	15	other	In the same manner that Navigation apps currently enable drivers to get to their destination - Spaceek enables them to find parking prior to even embarking.	We already began selling our platform solutions, we are deployed in more than 3 countries.	Yes.	Yes.	\$8M
SQream Technologies	SQream created the next generation big database that is running on GPUs (Graphical processing units). It enables - running very fast data crunching queries and AI algorithms on very large datasets with the best cost performance available.	35	Enterprise&IT software	The company developed the best GPU database in the world, one of the hottest areas in TMT/ICT - converging data crunching, AI workloads and the cloud. With customers in APAC, EMEA and US, the technology is validated and it's time for growth and govt market expansion. Other companies in this specific technology raised large amounts in the last few months.	2016 - ~\$1m of booking	Yes - In Israel, Thailand, India, Europe, US	~\$20m	~\$55m-\$65m
Unibody	We help our customers understand if a user on the website or mobile app is an authentic human user or an automated software agent - a malicious bot. Bots are causing billions of dollars of damages in ad-fraud, account takeovers and fake account registrations. We are already working with leading global brands like JD.com, Facebook, and Meituan-Dianping, and are rapidly expanding, particularly in the Chinese market.	12	Enterprise&IT software	We have been able to build a best in class solution for bot detection, and secure paid POC agreements, and full commercial agreements with top tier enterprise customers, while raising only a seed round so far. We are now starting to raise our series A, to expand and capitalize on our market momentum.	A top 5 global e-commerce website (JD.com), two of the top 10 global social networks (Facebook and LinkedIn), and many more.	Yes	Yes	\$25M
Visual Software Systems- Emaze	Emaze is the next generation of online content creation technology, enabling beautiful content design within minutes. While initially a key player in the presentation world, with more than 10M presentations created on the platform, Emaze has now expanded its realm to offer a creation tool for beautifully designed blogs, social hub websites, e-cards and photo albums in minutes. State of the art HTML5 technology enables the addition of gifs, media, live data, hyperlinking, and more. Innovative video, pan and zoom and 3D transitions transform content into journeys through virtual worlds. Easily share content anywhere on the web and then analyze who is watching with advanced analytics. Emaze empowers the everyday creator to be simply amazing.	12	Enterprise&IT software	Great live product with proof of concept and ready for scale	Millions in revenue and millions of users using our software	yes. Last year we made \$1.1M USD	Yes	\$15M-\$20M
vocazoom	Vocazoom delivers reliable and accurate sensors for Voice control and Voice authentication, in all real life noisy environments. Vocazoom provides the core technology for voice assistants, using voice authentication for payments and personalization of services in the connected and autonomous car.	22	Semiconductors	Large markets (automotive, Industrial IoT, Robotics), unique solution, strong team and IP	Funded projects with large automotive OEMs	2017 will be first year of sales, projecting \$1M by Q4 2017	yes	\$40M
